

IPL Hair Removal

WHAT IS SHR IPL HAIR REMOVAL?

Super Hair Removal (SHR) is the latest in state-of-the-art Intense Pulsed Light Treatments (IPL) and is able to deliver a pain-free permanent hair removal, in as little as half the time of standard IPL. By gradually heating the hair follicle, our SHR treatments disrupt the hair follicle's growth, so you can look forward to a lifetime of smooth skin with only occasional maintenance required. In just 6-8 treatments you can say goodbye to a lifetime of waxing, shaving and plucking!

IS IPL HAIR REMOVAL RIGHT FOR ME?

While SHR IPL works best on darker shades of hair, our IPL treatments are suitable for shades of blonde and red hair. Your clinician will provide a detailed assessment during your consultation.

HOW MANY TREATMENTS DOES IT TAKE?

This depends on your individual hair type. Most clients require 8-10 sessions to achieve brilliant results. Hair reduces and becomes finer from the very first treatment. For some, occasional maintenance treatment may be required.

HOW DOES IT FEEL?

IPL hair removal is a pain-free treatment, involving the application of heat to the skin which will cause a warming sensation. A cooling system is used throughout treatment to enhance your comfort.

Our highly trained staff will design a hair removal treatment plan specifically for you, so you can achieve optimum results.
